

1. Hydrate You IV (Healthcare & wellness)

Before: Needed a trustworthy web presence and operational content workflow for a US wellness brand.

Change: Delivered a production website structure and support process aligned with service-led growth.

After: Improved digital credibility and clearer service communication for new client acquisition.

2. M6 Labs (Professional services)

Before: Required a modern business website and structured updates without internal engineering overhead.

Change: Implemented a maintainable delivery pattern with clear content architecture and support handoff.

After: Faster content iteration cycle with stable, professional public presentation.

3. Dr. Rissy's Writing (Education & consulting)

Before: Needed a brand-consistent website that supports both service positioning and audience trust.

Change: Built a polished client-facing web experience with structured page hierarchy and CTA flow.

After: Improved visitor clarity on offerings and stronger conversion intent from inbound traffic.

4. Cardiff Health and Wellness (Healthcare & wellness)

Before: Needed stronger digital communication and site reliability for service inquiries.

Change: Delivered a stable website setup with business-focused messaging and clear contact pathways.

After: Higher confidence in online presence and smoother customer contact journeys.

5. Legend Consults (Consulting)

Before: Needed a professional online footprint to support outreach and credibility.

Change: Created a structured web presence with focused messaging and scalable content blocks.

After: Better alignment between service positioning and client expectations.

6. Mozilit (Technology services)

Before: Needed dependable technical implementation and maintainable site operations.

Change: Provided implementation support and practical engineering guidance for delivery quality.

After: Reduced maintenance friction and improved platform stability.

7. Operations Workflow Initiative (SMB operations)

Before: Manual process steps were causing delays and inconsistent execution.

Change: Designed automation-ready process flows and API-backed task handling patterns.

After: Reduced repetitive manual work and improved consistency across core workflows.

8. Education Platform Program (Education & training)

Before: Needed scalable delivery for learning content and administrative workflows.

Change: Implemented modular platform patterns for content operations and reporting support.

After: Established a foundation for scalable learning delivery and operational visibility.
